Would I Lie to You? Web App: Test Results

Summary

All tests run so far passed, and no defects were found. 37 of 37 automated tests and 24 of 24 manual checks passed on Thursday 12 November 2026. 5 test cases are still to run; none of them blocks client testing.

Item	Detail
Date	Thursday 12 November 2026
Tested by	Abdul-Haque Mohammed (manual checks driven with browser automation)
Code version	WILTY folder as of 12 Nov, 19:45 (local AI and lie bank; Claude removed)
Machine	Abdul-Haque's MacBook Pro, game running at http://127.0.0.1:5050
Browser	Built-in browser in the Claude desktop app (Chromium)
Automated tests	37 run, 37 passed (pytest)
Manual checks	24 run, 24 passed
Defects found	0
Not yet run	5 (see Outstanding tests)

Results

Automated tests

Run with `pytest` against the code in the WILTY folder: **37 passed, 0 failed**. They cover the game engine, lie bank, lie history, local AI client (with a fake model) and every page route.

Manual checks

Test	What was checked	Result
TC01 (FR1, FR2)	Setup with a missing player name is blocked with a message	Pass
TC03 (FR4)	Story form stays hidden until the named player clicks to show it	Pass
TC03 (FR4)	Submitting only 1 story is rejected	Pass
TC11 (FR8)	Statement hidden by default; Reveal and Hide work	Pass
TC12 (FR9)	Space does nothing while the statement is showing; hint turns red	Pass
TC12 (FR9)	Space starts the round once the statement is hidden	Pass
TC12 (FR9)	Pressing Space again mid-round does not restart the timer	Pass
TC13 (FR10)	Timer starts at 10:00 and counts down	Pass

Test	What was checked	Result
TC13 (FR10)	At 0:00 the game moves to the guess screen (clock fast-forwarded)	Pass
TC14 (FR11)	Ready to Guess stops the timer and opens the guess screen	Pass
TC15 (FR12)	Typing X is rejected; no points change	Pass
FR12	"Lock in LIE?" confirm appears before a guess counts	Pass
TC16 (FR13)	Correct guess: point to the guessing team	Pass
TC16 (FR13)	Wrong guess: point to the speaker's team	Pass
TC17 (FR14)	Reveal shows the statement, TRUTH or LIE, and who scored	Pass
TC18 (FR15)	Scoreboard and round counter update every round	Pass
TC02, TC10 (FR3, FR7)	Teams alternate, all 6 players speak once, no true story reused	Pass
TC20 (FR22)	3-3 after 6 rounds goes to sudden death; game ended 5-3 after 8 rounds	Pass
TC19 (FR16)	End screen names the winner; Play Again clears the game	Pass
TC25 (FR23)	Test mode shows the answer and writes nothing to the history file	Pass
TC31 (NFR6)	History file holds lies only; no names or true stories	Pass
TC36 (FR24)	Local AI chosen with Ollama not running: falls back to the lie bank with a message	Pass
TC27 (NFR1, NFR2)	Clean install on the MacBook with the README steps	Pass
TC29 (NFR4)	No API key in the code; `.env` excluded from Git	Pass

Outstanding tests

Test	Why not run yet	Next step
TC26 (FR18)	The timer beep needs a person to listen	Let one round run to 0:00 and listen
TC32 (NFR7)	Only one browser used so far	Play one game in Safari and one in Edge
TC37 (FR24)	Ollama not yet installed on the MacBook	Install Ollama, download the model, play one Local AI game and time how long lies take
TC34 (success criteria)	Needs real players	Covered by client testing (UAT2)
TC28 (NFR3)	Deployment is planned for later	Run when deploying

TC30 (Claude response time) was not run: Claude has been removed from the app, pending change request CR-02. Its replacement is the timing check in TC37.

Issues found

No defects. One tidy-up: the local `.env` file still has an empty `ANTHROPIC_API_KEY=` line from the old template. It is harmless and not committed, but should be deleted.

Ready for client testing?

Yes. Every Must requirement that can be tested on this machine has passed. Client testing can start once TC37 (local AI on the MacBook) has been run, so Graham can test with lies written by the AI.

Note: this project is a simulation of a real client engagement, run as a work experience exercise. Graham Fry acts as the client. All dates, check-ins and sign-offs are illustrative, not real commitments.
